CPS Timberland

- Distributor of chemical, fertilizer to;
- Ag (6)
- Turf and Ornamental (3)
- Aquatic (1)
- Vegetation Mgmt (1)
- WI Warehouses;
- DeForest and Plainfield
Application Methods
Cut Surface

- Treatment of cambium region is key
- If you are using penetrating oils with ester formulations, treat the sides of the stumps and collar regions
Girdle and Chemical
Basal Bark Treatments

- Coverage of the entire stem circumference is key to success.
- Must treat higher up on larger diameter stems.
- On root suckering species, make sure collar area is covered, treat root flares, or exposed roots.
- Do not treat when bark is wet.
Tools of the trade

- Chainsaw
- Brush cutter
- Backpack sprayer
- Mist blower
- Large Equipment
- Fire
Fire and Herbicide

* Intensity
Chemical Recipes
Autumn Olive
Black Locust
Buckthorn
Garlic Mustard – Garlon 4

2% 6 WAT
Garlic Mustard – Glyphosate
Garlic Mustard – Oust

Oust 1oz. 6 WAT
Honeysuckle
Japanese Barberry
Japanese Knotweed
Reed canary grass
Reed Canary Grass Abundance 6 Weeks Post Treatment

Herbicide Treatment

Percent Cover Reed Canary Grass
** Controls were nearly 100% Reed Canary Grass, but a significant portion was classified as “duff and bare ground” because the foliage had browned out during the hottest part of the summer.
Reseeding after Journey

- Big Blue
- Little Blue
- Indian grass
- Side oats grama
- Blue grama
- Any legume species
- I would suggest waiting 3 weeks after applications due to easier planting-dry foliage
Poison Ivy
Thank you for having me.
